**DETAILED ACTION**

***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. The claimed invention in claims 16-27, 46-57, 70-75, 82, 84, and 98-100 are directed to non-statutory subject matter. The claims are directed toward a program product; however, the program product of claim 16 does not appear to be embodied on a computer storage medium. Therefore, it is not clear that the program product is not intended to be in the form of a wave transmission. Claims directed to a signal directly or indirectly by claiming a medium (such as a carrier wave) are directed to a form of energy which at present the office feels does not fall into a category of invention. The other independent claims are rejected for the same reason as claim 16. The issues related with the independent claim are not corrected by the dependent claims and therefore, the dependent claims are rejected for the same reasons.

***Allowable Subject Matter***

3. Claims 10-15, 112-123, 28-45, 58-69, 76-81, 83, 85-97 and 101-111 are allowed.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Chavis whose telephone number is (571) 272-3720. The examiner can normally be reached on M-F, 9:00am-5:30pm, EST.
